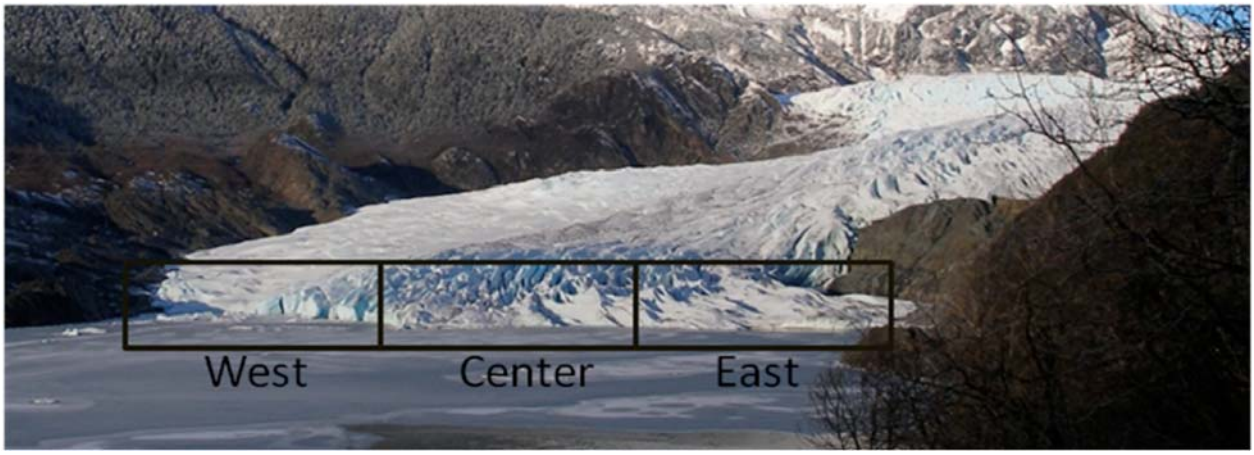
UNIVERSITY OF ALASKA SOUTHEAST

Mendenhall Glacier Calving Activity



The University of Alaska Southeast is currently conducting a study of Mendenhall Glacier ice dynamics and nearby meteorological conditions. Assistance with monitoring calving activity is greatly appreciated and will allow us to gain a better understanding of factors influencing such events. Please contact Logan Berner, Natural Science Research Technician, for more information. (907) 796-6036 berner.logan@gmail.com

Observer	Date	Time	Section (W/C/E)	Magnitude (0-5)	Event Notes Photo names, rate, etc…

Magnitude: 0 = No Activity Observed 1 = Minor 3 = Substantial 5 = Cataclysmic
